

517 - BOREAL BROWN

The Boreal Chickadee is the inspiration for this waterproof decking texture. A balanced mix of chestnut brown, snow white, and black flecks over a dark tan colour coat. Boreal Chickadees can be found from the Yukon, NWT, & Nunavut, across Canada's golden prairies, through Central Canada, and all the way to the farthest reaches of the Maritimes.

502 - BADLANDS TAN

Areas around the Alberta Badlands inspired this waterproof deck covering. Badlands Tan is a chip combination that brings to mind the rock formations around Drumheller, Alberta. A combination of white, tan, and brown flecks, highlighted with obsidian black chips provides a warm looking, and inviting surface for any deck

126 - HUDSON GREY

The eastern shores of Canada's world renowned Hudson's Bay are home to some of the oldest rock formations in the world. To honour these 4.2 billion year old rocks we created a balanced mix of white and obsidian chips with an almost equal sample of medium grey acrylic chips. A natural looking texture inspired by one of Mother Nature's early wonders.

616 - MOUNTAIN GRANITE

Rocky Mountain Granite is the newest Canadian inspired Flexstone texture offering. A combination of midnight black acrylic chips, mixed with faded grays and a sprinkle of ice-cap white over our grey aromatic urethane colour coat results in a deck covering reminiscent of a rocky outcropping somewhere deep in the Canadian Rocky Mountains.

COATINGS

ASH BROWN

This colour was formulated with the mighty ash tree in mind. The darker brown has a slightly reddish hue which would suit a neutral siding or brick - helping to bring out the vintage style of a stone or brick finish without distracting from the exterior beauty of the home.

MONTEREY SAND

Inspired by the sprawling beaches of southern California, Monterey Sand is an understated neutral tan colour that is well suited to homes or properties with earth tone colour schemes. Lighter tones, like Monterey Sand are ideal for reflecting UV rays and cooling the space below, saving on energy costs.

ROCKY GREY

Our most popular standard finish has a deep grey base with a slightly bluish hue. This modern colour is cool and moody in the evenings and brightens significantly in direct sunlight. The darker tone does a great job at hiding dirt, making it an ideal solution for customers looking for an attractive and low maintenance option.

SIDEWALK GREY

Our Sidewalk Grey finish is the most versatile colour option. The colour is neutral and compatible, making it an ideal option for customers looking for a subtle and complimentary colour to nearly any design scheme. Sidewalk Grey is a light tone that reflects heat and keeps living space below cool.
